

The Wonders of Weather

By Room 10, Grade 3

Unique white stars fall gently on nature's floor
Making a soft blanket
Falling upon my head on a snowy day
Light as a feather and as fluffy as kitten's fur
Piling on the ground like layers of white frosting
The wind blows forming a winter wonderland

The amazing wonders of weather
The amazing wonders of weather

Menacing black clouds form in the sky
Winds emerge from highs and lows colliding
The forceful winds rip the leaves off trees
Swirling bands create a deadly storm

The amazing wonders of weather
The amazing wonders of weather

Waiting for summer to come
At last the sun sizzles with warmth
Walking on the beach to the water
To cool myself down
Back to the burning sand and shells
. We jump back into the water
The amazing wonders of weather
